

SRAVANTHI SUNNAM

Dublin, Ireland | sravanthisunnam22@gmail.com | +353899489828 | <https://www.linkedin.com/in/sravanthi-sunnam/>

SUMMARY

ISTQB-certified Quality Assurance Engineer with 5 years of experience developing and maintaining automated test suites for web, API and mobile testing in Agile environment. Skilled in Python, Selenium, Robot Framework, Pytest, API testing, SQL validation, and CI/CD automation using Jenkins and GitHub Actions. Experienced in analysing requirements, reviewing acceptance criteria, designing automation scenarios, and applying functional, regression, integration and risk-based testing to identify issues early. Adept at collaborating with cross-functional teams to investigate defects, improve release quality and support reliable software delivery within Agile software development teams.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Test Automation:** Selenium WebDriver, Pytest, Robot Framework, BDD Cucumber, Gherkin, Page Object Model (POM)
- **Testing:** Functional, Regression, Smoke, Integration, End-to-End, API Testing, Exploratory, UAT
- **API Testing:** REST API Validation, Postman, Swagger
- **CI/CD & Tools:** Jenkins, Git, GitHub Actions, Continuous Integration, Continuous Delivery
- **Database & Data Validation:** PostgreSQL, MySQL, SQL Server
- **Test & Defect Management:** Test Case Design, Requirement Analysis, User Story Analysis, Test Data Management, Test Coverage Analysis, Defect Tracking, Defect Management, Defect Investigation, Root Cause Analysis
- **Methodologies:** Agile Scrum, Agile Testing, SDLC, STLC

EXPERIENCE

Quality Assurance Engineer

Mar 2022 – May 2024

Blueface, A Comcast Business Company, Ireland

- Developed and maintained Python and Robot Framework automation suites for web and API applications, increasing regression coverage to 90% and reducing manual regression effort by 30%.
- Executed functional, regression, exploratory, and end-to-end testing across web and mobile applications, identifying critical defects and validating key business workflows before release.
- Performed REST API testing using Postman, Swagger and Robot Framework (Python), validating request/response payloads, authentication mechanisms, business rules, and backend integrations to improve API reliability.
- Integrated automated UI and API test suites into GitHub Actions CI/CD pipelines, shortening release validation timelines and enabling faster quality feedback during development and release cycles.
- Analysed business and technical requirements, reviewed acceptance criteria with developers and product owners, and translated them into test scenarios and coverage to identify gaps early in the development cycles.
- Investigated application logs, test failures and production issues, collaborating with developers and technical stakeholders to identify defects, support root cause analysis and accelerate resolution.
- Created and maintained test cases, test execution documentation and defect records in Jira, ensuring traceability between business requirements, test coverage and execution results.

Test Engineer

Ideative Digital Private Limited, India

Jun 2016 – Feb 2019

- Designed and maintained end-to-end automation tests for web applications using Selenium WebDriver, Python, Pytest, Behave BDD, Gherkin, and Page Object Model (POM), improving regression coverage and reducing manual testing.
- Integrated automated smoke and regression test suites into CI/CD pipelines using Jenkins, increasing feedback speed and improving release stability by 40% while enabling faster quality validation.
- Performed test analysis, automation scenario design, and regression planning based on business and functional requirements, ensuring comprehensive and traceable test coverage.
- Conducted data integration and backend validation using SQL, verifying data accuracy, transformation logic, and consistency across multiple integrated systems and databases.
- Collaborated closely with Product Owners and Developers to analyse user stories, review acceptance criteria, create detailed test cases in Jira and test data, and ensure complete test coverage across automation and manual testing activities.
- Participated actively in Agile Scrum ceremonies including sprint planning, backlog refinement, daily stand-ups, sprint reviews and retrospectives, contributing to quality-focused delivery throughout the SDLC.

CERTIFICATIONS & COURSES

- ISTQB Certified Tester Foundation Level (CTFL)

EDUCATION

- Master of Science in Data Analytics: Dublin Business School, Ireland | 2020
- Bachelors in Mathematics, Statistics & Computer Science: Loyola Academy Degree & PG College, India | 2016

KEY ACHIEVEMENTS

- Increased regression automation coverage to 90%, reducing manual testing effort by 30% and accelerating release readiness across web and API platforms.
- Recognised as Top Performer for consistently delivering high-quality releases, meeting sprint commitments and supporting stable production deployments.
