SUMMARY

ISTQB certified QA Automation Engineer with 5 years of experience in manual and test automated testing of web applications and REST APIs, alongside manual android and iOS testing. Built automated tests using Python, Selenium WebDriver and Robot Framework, integrating regression suites into CI/CD pipelines. Contributed to Python-to-Java test migration using Devin AI and reviewed the generated code. Validated APIs, backend integrations and data using SQL checks. Collaborated with developers and product owners on requirements, defect investigation and release readiness.

TECHNICAL SKILLS

- **Test Automation:** Selenium WebDriver, Robot Framework, Pytest, Pytest-BDD, Page Object Model (POM), Gherkin, Citi FAST Framework
- **Programming Languages:** Python, Java
- **Testing:** Functional, Regression, Integration, System, End-to-End, Exploratory, Smoke, UAT, Risk-Based Testing, Manual Mobile Testing (Android/iOS)
- **API & Backend Testing:** REST API Testing, Postman, Swagger
- **CI/CD & Tools:** Jenkins, Git, GitHub Actions, Bitbucket
- **Test Planning & Analysis:** Requirements and Acceptance Criteria Review, Test Case Design, Test Data Management, Test Coverage Analysis
- **Database & SQL:** PostgreSQL, MySQL, SQL Server, Data Integrity Validation
- **Defect Management:** Defect Reporting, Tracking and investigation, Root Cause Analysis
- **Test Management & Documentation:** Jira, Zephyr, TestRail, Confluence
- **Methodologies:** Agile/Scrum, BDD, SDLC, STLC
- **AI-Assisted Testing:** Devin AI, GitHub Copilot, AI-assisted Test Case Generation

EXPERIENCE

Intermediate Programmer Analyst (SDET)

Jan 2026 – Feb 2026

Citi, Ireland

- Converted Python automated test scripts to Java using Citi's in-house FAST Framework and Selenium libraries, maintaining regression coverage for the American Depositary Receipts (ADR) application within Issuer Services.
- Reviewed Java code generated with Devin AI, checking business rules and assertions to ensure the converted tests checked the intended functionality.
- Executed migrated regression suites, compared results with the existing Python tests and investigated discrepancies in test behaviour.
- Maintained regression execution records in Zephyr, linked test results to defects and documented retest outcomes to track unresolved issues.

Senior QA Engineer

Mar 2022 – May 2024

Blueface, A Comcast Business Company, Ireland

- Developed and maintained Python and Robot Framework tests for web applications and REST APIs, achieving 90% automated regression coverage and reducing manual regression effort by around 30%.
- Analysed requirements and reviewed acceptance criteria with developers and product owners, identifying gaps and defining test scenarios for critical workflows.
- Validated REST APIs using Postman, Swagger and Robot Framework, checking authentication, JSON payloads, business rules and backend integrations.
- Integrated automated UI and API regression suites into GitHub Actions pipelines, enabling developers to identify failures and verify fixes before release.
- Investigated test failures by reviewing application logs and test results, reported defects and retested affected workflows to verify fixes with developers.
- Performed manual functional, integration, exploratory and end-to-end testing of web and mobile applications (Android/iOS), validating key business workflows and identifying critical defects before release.

Test Engineer

Ideative Digital Private Limited, India

Jun 2016 – Feb 2019

- Developed and maintained 700+ automated UI tests using Python, Selenium WebDriver, Pytest-BDD and Page Object Model, improving regression coverage and reducing manual testing effort across web applications.
- Configured Jenkins jobs to run automated regression tests and reviewed failed runs to identify issues before release.
- Analysed business and functional requirements, identified workflows to automate and planned regression tests for new features and changes.
- Utilised SQL to validate backend data accuracy and consistency across integrated systems and databases.
- Coordinated sprint testing with product owners and developers, clarifying requirements, discussing defects and preparing test data.
- Automated key user workflows using Java and Selenium WebDriver during an internship, translating functional scenarios into executable tests.

CERTIFICATIONS & COURSES

- ISTQB Certified Tester Foundation Level (CTFL)

EDUCATION

- Master of Science in Data Analytics: Dublin Business School, Ireland | 2020
- Bachelors in Mathematics, Statistics & Computer Science: Loyola Academy Degree & PG College, India | 2016

KEY ACHIEVEMENTS

- Earned Top Performer recognition for meeting sprint testing commitments and identifying defects before release.
